**Breeders Statement:**

As the owner of the attached list of DNA samples, I declare the following:

1. the products do not come from animals that are known or suspected to be infected with a pathogen that causes a notifiable disease to which the animals from which the products are obtained are susceptible according to the Animal Health Regulations of South Africa; and
2. the products do not come from animals in a premises or region or area of a country that is subject to official restrictions due to a notifiable disease to which the animals are susceptible according to the South African National Animal Health Regulations, and
3. the animals from which the samples were obtained were under routine veterinary control and showed no signs of infectious diseases when the samples were collected.

**I also confirm that the results can be sent directly to my society and recorded on the society database.****Note: Father / parentage verification with SNPs can only be done if the father or both father and mother also have SNP profiles.****Signature:****Date:**
